FORCATS DATA WRANGLING

TOOLS AND PROGRAMMING LANGUAGES
BENJAMIN HABERKORN UND ALEXANDER KLEINE

CONTENT

- What is blogdown?
- How is blogdown structured?
- Example and operations of Blogdown
- How to use forcats?
- Data Source : OpenWeather
- Examples with Forcats

WHAT IS BLOGDOWN?

- Provides an ecosystem for creating complex websites
- Uses only html, css and javascript and works without any other scripting languages like php
- Individual websites or blog entries can be generated via an RMarkdown document

WHAT IS BLOGDOWN?

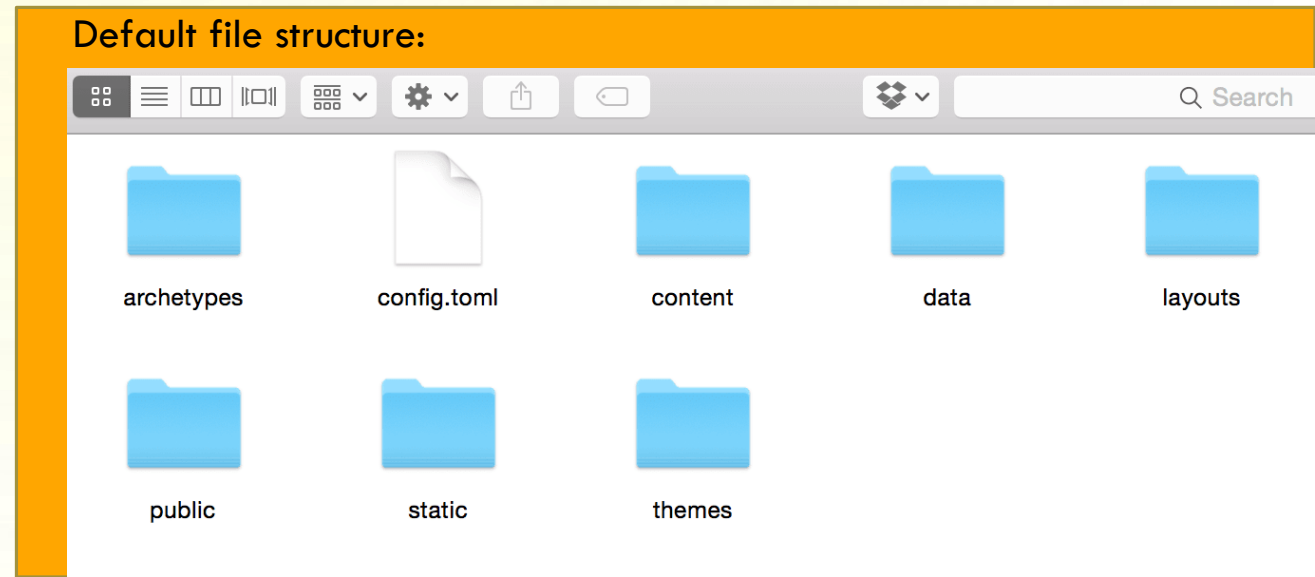

- There are many ready-made themes for every application
- Offers simplified setting options via YAML metadata
- Easy publication through plugins for Github Pages or other platforms

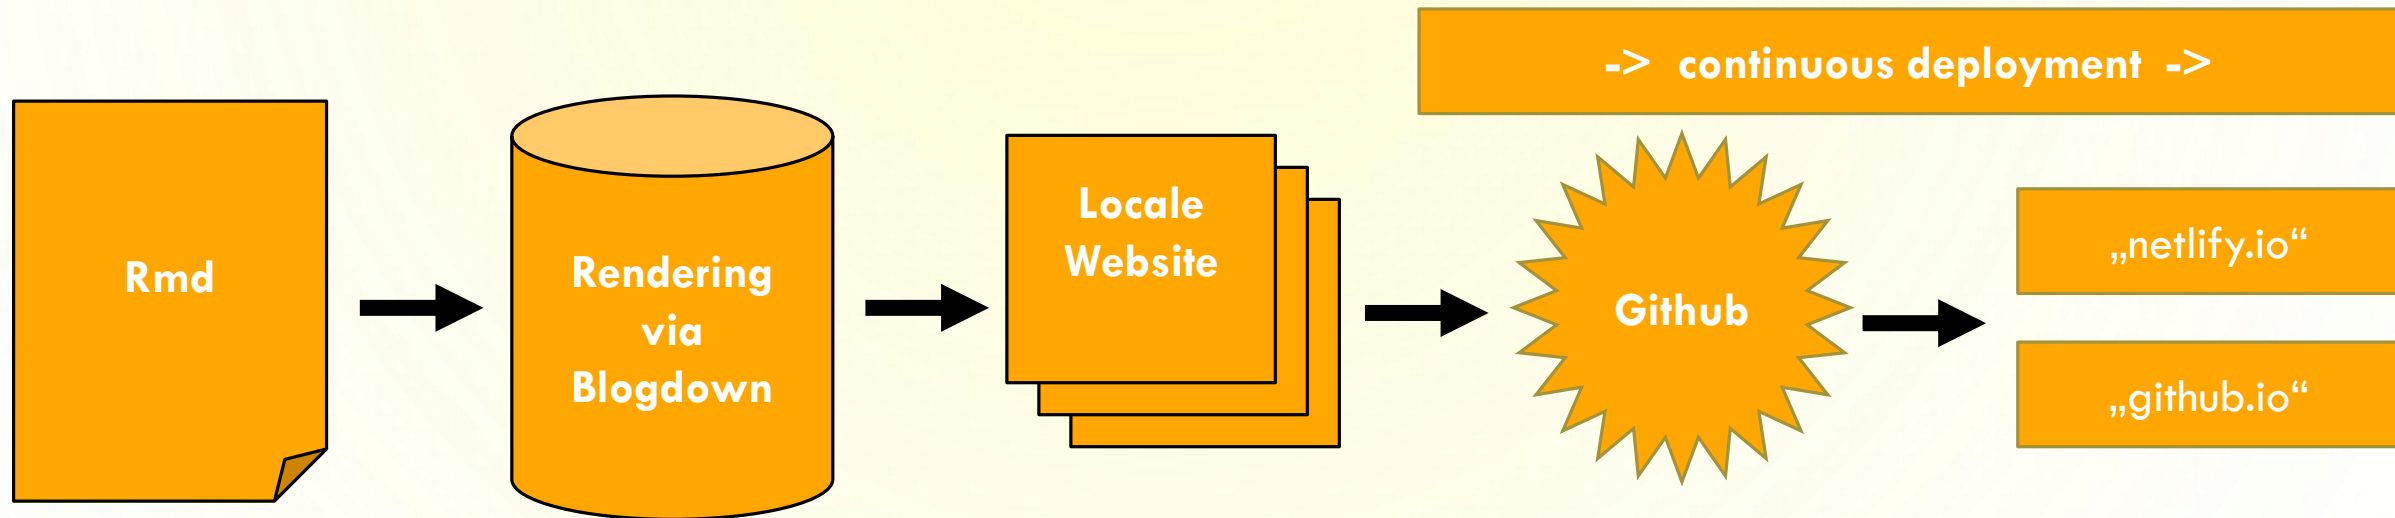

HOW IS BLOGDOWN STRUCTURED?

- “config.toml” is the configuration file for the generated website.
- Your Rmd files are saved and converted at the folder “content”
- For the upcoming website ecosystem you use “public”

HOW IS BLOGDOWN STRUCTURED?

ONLY A FEW COMMANDS

- Installation of the particular package as a setup
 - `install:packages ("blogdown")`
- Two steps to render you Rmd file
 - `blogdown::(build_site)`
 - `blogdown::(serve_site)`

EXAMPLE AND OPERATIONS OF BLOGDOWN

HOW TO USE FORCATS?

- Provides tools to solve common problems with factors
- Factors are used for categorical variables
 - Fixed set of possible values
 - Blue, Green, Yellow || 1, 2, 3
 - S < M < L || 1 < 2 < 3

DATA SOURCE

- A free API for weather forecasting
 - Current and historical weather data
- API-key is needed to use the data
- Wrapper package for r that makes the functions available
 - `owmr`
